# Product Description

## Rabbit anti Ca<sup>2+</sup>-ATP-ase, Isoform 4

**Product:** Rabbit anti-Ca<sup>2+</sup>-ATPase, isoform 4

**Code No:** PMCA4

**Lot no:** #10

**Form:** Lyophilized whole serum (no preservatives).

**Quantity:** 200 µl.

**Reconstitution:** with 200 µl of bidistilled water.

### Description

The antiserum against Ca<sup>2+</sup>-ATPase, isoform 4, was produced in rabbits by immunization with the N-terminal sequence-specific peptide of the human pump as epitope. It recognizes the corresponding proteins in human, rat and mouse tissue. The antibody was evaluated for specificity and potency: a) by Biotin-Avidin labelling of cryostat-sections of 4% paraformaldehyde fixed tissue and b) by immunoenzymatic labelling of Western blots of brain membranes or primary nerve cell cultures. It can also be used for immunoprecipitation. The serum was inactivated at 50°C for 30 minutes.

### Working dilutions

Immunohistochemistry: 1: 1'000 - 1: 2'000.

Immunoblots : 1: 1'000 - 1: 2'000.

For immunohistochemistry and immunoblots the titer was determined by using the avidin-biotin method. We recommend that the optimal dilutions be determined by titration experiments.

### Storage

After reconstitution freeze in small aliquots (e.g. 1 µl) and keep at - 80°C (or at least - 20°C). For continuous use keep at 4°C (with 0.01% Na-azide). Avoid repeated freezing and thawing.
